The main aim of the seminar was to inculcate the students to have self-confidence and to have an in depth understanding of the subject in general and the topic in particular. It was therefore considered to be one form of continuous internal assessment; hence students were graded as per their performance which were divided into the following points:

- a. Introduction
- b. Presentation
- c. Slide content
- d. Question & Answer

The seminar was presented by 33 students from B.Sc 5<sup>th</sup> Semester in the presence of B.Sc 3<sup>rd</sup> Semester Physics Honours Students and their attendance were recorded.

All the students tried their level best to deliver and some students presented their seminar on their particular topics so brilliantly that it was a joy to watch and listen to them. They took great pain in their preparation and credits were given accordingly. For each seminar presenter their fellow students from other groups were allowed to ask questions on the topic and the presenters did their best in answering the questions.

Before the end of the program, students from 5<sup>th</sup> & 3<sup>rd</sup> Semester were allowed to give verbal feedback in which they expressed their satisfaction and appreciation to the department for the opportunity that will help them built self-confidence and better understanding of the subject which will go a long way in their future academic life.

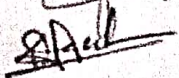

The program was very satisfactory for the students and very fruitful for the Department.
