Recommendation & Conclusions:

Students were found to be interested and enthusiastic about all topics in the Courses and gained reasonable skills experience They are hoping to get other training in Computers Internet Skills. It is necessary to motivate the decision makers to invest on required IT infrastructure so that more students can be accommodated and more courses can be conducted in future for the benefit of the students.

The idea behind imparting such vocational courses is to equip the students, specifically from the economically marginalised section of the society with skills and expertise which would allow them to sustain themselves and hopefully become job givers and not job seekers in the not so distant future.
